

Reem Makarem

Computer Engineering Student | Minor in Mathematics
Lebanese American University (LAU)

+961 76361159 | reem.makarem01@lau.edu

[linkedin.com/in/reem-makarem-89468a2bb](https://www.linkedin.com/in/reem-makarem-89468a2bb)

Education

- Bachelor of Engineering in Computer Engineering – 3rd Year | GPA: 4.00 (recent semesters) | CGPA: 3.79
- Minor in Mathematics
- Honors Program Student

Experience

IEEE WIE Marking Team – Lebanon Sector

WIE (Lebanon Sector)

IEEE Women in Engineering

Jan 2025 - present

- Planned and executed national STEM outreach campaigns in collaboration with cross-university teams.
- Designed engaging visual and written content for national STEM outreach campaigns
- Supported digital branding efforts and amplify WIE's message across platforms

Media Assistant (Part-time)

International Services and Programs Office-LAU

Jan 2024 – present

- Develop and manage multimedia content to promote global mobility and exchange programs.
- Oversee social media communication strategy, improving audience reach and engagement.

Database Digitization Intern (Full-time)

Aabadieh Municipality

May 2024- August 2024

- Transformed legacy municipal records into a fully electronic database system.
- Structured and migrated datasets to improve accessibility, searchability, and reliability of citizen records.
- Collaborated with municipal staff to define workflows, demonstrating data engineering. Designed tailored problem-solving sessions that improved conceptual understanding and academic performance.

Podcast Editor — Youth Talks: The Tomorrow's Leaders Gender Scholars Podcast (MEPI Tomorrow's Leaders Program)

- Edited and produced podcast episodes for *Youth Talks*, amplifying stories on gender, leadership, and youth empowerment within the MEPI Tomorrow's Leaders community..

Projects

Analog AM Radio Receiver Circuit

Electronics Final Project – Spring 2025

- Designed a full AM receiver system with demodulation, baseband amplification, and Class A output to drive a speaker.
- Implemented a passive envelope detector, simulated and tested SPICE models, and built the physical circuit.
- Achieved real-time audio playback using SPICE simulation, soldering, and hardware integration.

LebanEase Bus Transportation System

Database Systems Final Project – Fall 2025

- Designed and implemented a database-driven transportation platform using MySQL and Java, with a responsive frontend built in HTML/CSS.
- Integrated frontend and backend components to support reservations, trip tracking, and payment workflows.
- Authored comprehensive project documentation covering system architecture and database design.

Awards & Recognitions

- Dean's Distinguished List at LAU (Academic year 2023-2024, 2024-2025)
- Certificate of Excellence - TEDx Irfan High School (2022)
- Certificate of Recognition – Irfan 50th Anniversary Alumni Event (2022)
- Certificate of Excellence in Academic Performance – Irfan High School (2022–2023)

Technical Skills

- Programming & Software: C++, Java, Python, MATLAB, MySQL
- Robotics & Stimulation: Quartus II, LTspice
- Web Dev: HTML, CSS, Java Script
- Core Competencies: Object-Oriented Design, Data Structures & Algorithms, Signal Processing, Microprocessor Architecture
